THE UNIVERSITY OF CALIFORNIA, LOS ANGELES

Type: ROUTINE INSPECTION

Date: Apr-09-2009

LOS ANGELES, CA 90024

3.1 (b)

HOUSING FACILITIES, GENERAL.

Sec. 3.1 Housing facilities, general.

(b) Animal areas inside of housing facilities must be kept neat and free of clutter, including equipment, furniture, and stored material, but may contain materials actually used and necessary for cleaning the area, and fixtures or equipment necessary for proper husbandry practices and research needs.

The canine clinic room is used to perform minor procedures on dogs. At time of inspection the room was untidy. The counter tops were cluttered with medical materials and there was an opened surgical pack on the treatment table. Procedural rooms should be cleaned after each use and be maintained so as to minimize disease hazards.

To be corrected before further procedures are conducted in this area

3.125 (c)

FACILITIES, GENERAL.

Sec. 3.125 Facilities, general.

(c) Storage. Supplies of food and bedding shall be stored in facilities which adequately protect such supplies against deterioration, molding, or contamination by vermin.

There was a food bin located in the enrichment room that was filled with peanuts. The top of the bin was not securely fastened and there were approximately 10 small moths found among the peanuts. The presence of insects in food bins may contaminate its contents. The peanuts should be discarded. Food for the animals shall be stored in facilities which adequately protect such supplies against deterioration, molding, or contamination by vermin.

Corrected during inspection

3.131

SANITATION.

(c) Housekeeping. Premises (buildings and grounds) shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this

Inspection Report

subpart.

In the enrichment room there was a small to moderate amount of debris on the counter tops and the floor was moderately soiled. According to the daily cleaning logs, the room has not been serviced in the past week. Since some food preparation is done in this room and it is a high traffic area for animal care personnel, additional housekeeping may be needed to maintain the room in compliance with the Act. Premises (buildings and grounds) shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart.

To be corrected by April 13, 2009
